No. 5965

P 139.

Rec. 28/11/pm. 18-11-74

From the Commissioner, Nundydroog Division, To the Offg. Superintending Engineer of Irrigation Works in Mysore, No. 148, dated Bangalore, 28th August 1874.

In forwarding the accompanying estimate with plan amounting to Rs. 1,138 for repairing the Banahallikere, registered No. 723, in the Betmangala Taluk, I have the honor to state as follows.

2. This was a kodgi tank and was in a dilapidated condition, and on intimation received from the Superintendent of Inam Settlement, the land granted as kodgi inam, measuring 12·82 acres and assessed at Rs. 12—0—11, was resumed in December 1870.

3. Subsequently, two parties, Gurikar Muniyappa and Venkatramanappa, who, it appears, had formerly purchased the kodgi inam, undertook in a petition addressed to the Deputy Commissioner to repair the tank thoroughly on condition of the inam being restored to them.

4. Mr. Krishnaiengar in submitting the proposal, recommended that the petitioners' request should be granted, observing that the revenue derived annually from the tank being only Rs. 9 would not justify so large an outlay on the part of Government, as, from personal inspection of the tank, he considered that the repairs would cost not less than 1,000 Rs.

5. Upon this, Major Hill, during his incumbency as Offg. Commissioner of this Division, called for a correct plan and estimate to be prepared by the District Surveyor. On receipt of which, Major Hay, during his tenure of office, requested to be informed what the area of the bed of the tank was, and what amount would be realized by letting out both it and the land below the tank for dry cultivation. From which questions, I conclude that he intended to propose that the tank should be breached and the land given out for dry crops.

6. The Deputy Commissioner in furnishing the information above called for, states in his *docket (copy of which is enclosed) that the total assessment from dry cultivation, both in the bed and below the tank, would be less than the amount realized at present from wet cultivation, and that much hardship would be experienced both by the ryots themselves and by their cattle, if the tank were to be breached, as it is the chief source of water supply to the village in its immediate vicinity. I therefore beg to submit the estimate for consideration.

*No. 1010—410, dated 7th August 1874.

From the Offg. Superintending Engineer of Irrigation Works in Mysore, To the Commissioner, Nundydroog Division, No. 2479, dated Bangalore, 15th September 1874.

I have the honor to acknowledge the receipt of your No. 148 of 28th August last forwarding an estimate amounting to Rs. 1,138 for the repair of the Banahallikere in the Betmangala Taluk.

2. From the plan forwarded it would appear as if the tank was a mere puddle, yielding a revenue of Rs. 11 only, and as, with the exception of the narrow arm A. B, no increase in capacity is proposed, it appears doubtful whether the increase of revenue anticipated of Rs. 20 can be realized. Even if it be, still the proposed expenditure will be nearly 40 years' revenue and will not be remunerative.

3. I observe that the ryots offer no contribution, so that it would appear that they do not attach much importance to the tank.

4. Before taking the orders of the Chief Commissioner on the tank, I shall feel obliged by your causing me to be informed of the position of the tank in the chain and series and the drainage into which its surplus flows.

From the Deputy Commissioner, Kolar District, To the Commissioner, Nundydroog Division, No. 1403—563, dated Kolar, 26th September 1874.

In reply to your official memorandum No. 459 of the 23rd instant, forwarding copy of correspondence between yourself and the Superintending Engineer of Irrigation in Mysore on the subject of repairing the Banahallikere, registered No. 723, of the Betmangala Taluk, I have the honor with reference to paras 2 and 3 of the Superintending Engineer's letter of the 15th instant, to state that it is true that

the repair of this tank is not remunerative to the Government, but as its abandonment will cause hardship to the people and cattle of the village, and as the ryots are in indigent circumstances to contribute a reasonable sum, I respectfully beg to repeat my recommendation to permit the late kodgidars to put it in order at their own cost, according to plan and estimate already submitted, on condition of the resumed inam being restored to them.

2. With regard to para 4 of the Superintending Engineer's letter under advertence, I beg to state that this tank is an isolated one, and does not belong to any series or chain of tanks. It empties its surplus water in the Budikote stream.

No. 5065—Rev. 139, dated Bangalore, 18th November 1874.

Order thereon.—As the Deputy Commissioner of Kolar considers that the restoration of the tank is indispensable for the supply of drinking water to the people and cattle of the village, and the work as a Government project is reported to be unremunerative, the Chief Commissioner will not withhold his assent to the revival and restoration of the resumed kodgi inam, on the express condition of the grantees' keeping up the tank in an efficient state of repair. In order to economize the supply of water in it and make it go as far as possible in meeting the requirements of the villagers, the small wet cultivation under it may be stopped, and the highest rate of dry assessment charged thereon.

H. WELLESLEY,
Offg. Secretary.

Chief Cons. for orders

—

Estimate of Rs. 1138 for repairing the Banchalli Tank in the Baikunthpur Taluq

The Tank, which is an isolated one, is a mere puddle yielding a revenue of Rs. 10 only and although an increase of Rs. 10 is promised it appears very doubtful whether it could be realized. The ryots are too poor to contribute

2. The Dep. Cons. of Coke proposes that the lodijan, which had been resumed, should be restored to the parties who have purchased it on condition that they carry out the work according to the Estimate

3. The Tank is stated to be much required for drinking purposes and the arrangement appears to be the best practicable.

No 148

Commissioner office
Ramandroog Durgum
Bangalore 28 August 1874

To

The Supg. Engineer of
Irrigation Works of Mysore

Sir,

In forwarding the accompanying Estimate with plan amounting to Rs. 1138 for repairing the Ranahully Kere Reg.d no 723 in the Betmangla Talnk, I have the honor to state as follows.

2. This was a Hodge tank & was in a dilapidated condition. On intimation received from the Superintendent of Inam settlement, the land granted as Hodgi Inam, measuring 12.82 acres and assessed at Rs. 12-4-11 was resumed in December 1870

3 Subsequently, two parties, Gurukar Immiapa and Venkatramanapa, who, it appears had formerly purchased the Hodgi Inam, undertook in a petition addressed to the Deputy Commissioner to repair the Tank thoroughly, on condition of the Inam being restored to them.

4. Mr Krishnaiyar in submitting the proposal, recommended that the petitioners request should be granted; observing that the revenue derived annually from the tank being only Rs. 9, would not justify so large an outlay on the part of Government as from personal inspection of the tank, he considered that the repairs would cost not less than 1000 Rupees.

5. Upon this Major Hill, during his incumbency as offg. Commissioner of this Division called for a correct plan & Estimate to be prepared by the District Surveyor. On receipt of which, Major Hay, during his tenure of office, requested to be informed what the area of the bed of the Tank was, and what amount would be realized by letting out both it and the land below the Tank for dry cultivation. From which questions, I conclude that he intended to propose that the Tank should be breached & the land given out for dry crops.

6. The Deputy Commissioner in furnishing

the information above called for. States in his
docket (copy of which is enclosed) that the total
assessment from dry cultivation both in the
bed and below the Tank would be less than
the amount realized at present from wet
cultivation; & that much hardship would be
experienced both by the Ryots themselves & by their
cattle, if the Tank were to be breached, as it is the
chief source of water supply to the village in its
immediate vicinity. I therefore beg to submit the
Estimate for consideration.
